N. 27th Street near Fletcher Ave.
Lincoln, NE 68521

Site Work Bid Clarifications:

1. Floor slab to be supported by 36" of lean clay structural fill. This can be achieved through a combination of over excavation and recompaction of site soils or structural fill placed to raise site grades. Structural fill soils should extend 5' beyond the building perimeter and be moisture conditioned and recompact in accordance with section 6.2 of the geotechnical engineering report.
2. Pavement areas to be supported by 24" of lean clay structural fill. This can be achieved through a combination of over-excavation and recompaction of site soils or structural fill placed to raise site grades. Structural fill soils should extend 2' beyond the paving perimeter and be moisture conditioned and recompact in accordance with section 6.2 of the geotechnical engineering report.
3. Provide unit costs for cut/haul and import fill.
