

Express Oil Change Stillwater, OK

4420 West 6th Avenue

Stillwater, OK 74074

Bid Clarifications:

1. Include undercutting the pit slab 2' and import fill in lifts per geotechnical engineering report.
2. After proofrolling, the existing fill material should be scarified to a depth of 9" and moisture conditioned per geotechnical engineering report.
3. Provide dewatering for the pit over excavation and installation of the pit slab as required.
4. Provide unit pricing for cut/haul and import fill.
